Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,13, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Harman.

Harman teaches a power supply output 36 for supplying power to a load, a pass device 26 coupled to said power supply output for controlling said supplied power, and a control circuit 68 that controls the gate voltage (the output of amp 54) which controls the pass device 26.

Allowable Subject Matter

Claims 2-12,14-16,26,27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 17-24 and 28 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The above claims add limitations that are not conventional practice in the art and would not have been obvious to persons of ordinary skill in the art.
